

BASTROP COUNTY WATER CONTROL AND IMPROVEMENT DISTRICT #2

Dear Wastewater Customer,

Welcome to the new Bastrop County WCID #2 Wastewater System. Please sign letter below where indicated and return to the district office in a self- addressed envelope. Attached you will find instructions for the care and use of your new Gatorgrinder.

We are currently in the process of connecting customers to the wastewater system in Phase I. After careful review by the district engineers and operators, we have determined that the Gatorgrinder is the most dependable and cost effective pump available. Your cooperation in caring for the pump will insure its long term dependable service.

Certain materials should not be put into your sewer or kitchen waste disposal unit. They are:

Glass	Diapers, socks, rags or cloth
Metal	Plastic objects (toys, utensils, etc.)
Seafood shells	Sanitary napkins or tampons
Egg shells	Dirt or Sand

In addition, you must never introduce into any sewer the following:

Explosives	Strong Chemicals
Flammable Material	Gasoline
Lubricating oil and/or grease	

Any damage caused by unauthorized maintenance will be charged to the customer. Any damage caused by the introduction of forbidden materials will be charged to the customer.

Should a problem arise, you will need to call the water district at 321 -1688 to report the situation.

Do not call a plumber or try to work on the pump yourself.

Your Gatorgrinder service is subject to the Rates, Rules and Regulations adopted by the Bastrop County WCID #2.

We look forward to serving you for all your future wastewater needs.

Sincerely,

Karen Pinard
General Manager
BCWCID#2

I have read and understand the conditions
of the Gatorgrinder Pump
